Dear Aishwarya,

As per FCC's requirements, there is no requirement to file for a class 1 permissive change. As long as the 15B testing is conducted, the manufacturer just needs to retain this test report for their own records.

[§2.1043 Changes in certificated equipment.](#)

(1) A Class I permissive change includes those modifications in the equipment which do not degrade the characteristics reported by the manufacturer and accepted by the Commission when certification is granted. **No filing is required for a Class I permissive change.**

Therefore, there is no action required from a TCB in this case of a class 1 permissive change.

Regards,

Eileen Yang

Hi Eileen,

Recently we got the sample for testing which is already FCC certified with a registered FCC ID : DRI128SCP

The major changes are in the external adapter so we did fcc part 15 B testing and reported . kindly consider the customer declaration , our updated test report and please make the class 1 changes to this ID.

Thanks & Regards.
